

# Case Study

Delivering an end-to-end web solution,  
using **HIPPA** compliance for a major healthcare giant!

# BACKGROUND

Knowing that the technology has come a full circle to its core, it is of no surprise that tech has played a vital role in changing lives for better. Understanding the recent technical trends that have been important in changing the entire face of the healthcare industry, making it more digitally enabled.

Following the same trends, a healthcare organization, founded in 2013, as a spinoff from the University of South Carolina, is focused to leverage the work spearheaded by a reputed & established doctor, on the effects of inflammatory diets on health in the commercial markets.

## Web & Mobile based solution:

This healthcare company wanted to create a strong web & mobile presence to enable ease of access for brand awareness, expansion and outreach. They would want to create a website, which will serve as a customer portal for their diet intervention. This site needs to be HIPAA compliant which, will be stationed on their servers.

## Mobinius™ Solution

Since we knew that our client is from the healthcare major industry, we primarily suggested them to get the HIPPA (The Health Insurance Portability and Accountability Act) in place. This becomes a mandate, as it sets the ball rolling for the overall sensitization or the protection of the entire data. As we all are aware, data threats are spread across the net and also, the utmost concern becomes is the protection of the data!

With HIPPA, being in place, one can be rest assured about the data being safe and, also being one of the most important compliant to be in place, as it eliminates the possibilities of data hacking.

Also, the organizations dealing with (HIPAA), meet the parameters for protecting the data against any theft / hacking etc. The organizations dealing with HIPPA compliance, should have the physical, network, and process security measures in place and follow them to ensure HIPAA Compliance. We actually dug deep and structured the entire HIPPA compliance into 3 major sections, as mentioned below:

The entire scene of HIPAA compliance is rapidly changing around the entire IT Industry. And, as we all know, HIPPA is not just a onetime process – it is a continuous process and yes, the way technology is evolving rapidly, one needs to be on-the-go and always abreast about the latest developments.

*Hence, we @Mobinius™ have always believed in embracing technology, along with the growing tech trends.*

# TESTIMONIAL

## Dedicated with consistent results

*Dealing with health and being healthy has been our forte. We chose Mobinius™ as we were looking for an organization who understands the Indian health index when it comes to healthy diets & is also globally recognized. We are really happy to see their dedicated efforts, which we are sure, shall enhance our entire product range and also working with them has always been a positive experience for us. We are glad to be associated with them.*
